## International Symposium on Optomechatronic Technologies (ISOT 2008)

17 - 19 November 2008  
San Diego Marriott Hotel & Marina

San Diego, California, 92101 USA  
Hotel Phone: +1 619 234 1500

### Welcome!

In recent years, most engineered products, processes, and systems have been evolving towards higher functionality, flexibility, intelligence, and miniaturization. This trend is stimulated by the ongoing fusion between optical and mechatronic technologies leading not only to enhanced performance but also to the creation of new, innovative functionalities. Because of its synergistic effect, the integration of these engineering fields, labeled optomechatronic technology, is becoming a major driving force to future enabling technologies.

The objective of this symposium is to gather researchers and engineers working in the field of optomechatronics and to provide them with a forum for discussion for exchanging their points of view and experience and sharing their research results through high quality peer reviewed papers.

We thank you for your participation in ISOT 2008!
